Still, we believe in personals. We believe in just such as we week's issue on the anniversary of her 98th birthday. We believe in all locals which are of real interest to the public, and to gather such we shall spare neither effort nor time. But the ambition of the Enterprise will never be simply to fill its columns. Quality will always be to us the first consideration.

The Enterprise started out two years ago with the thought made prominent tical rule. in its manifesto of Oct. 1st, 1898, that it would, so far as possible, be an instructor in all good things as well as a newsgatherer, and never for a moment have terprise has always been more than willto recite it. We have consulted the books and recognized the authorities. The real newspaper cannot be made up altogether on the streets. There must be an inner sanctum where the editorial department is safe from intrusion, and where the editor is willing to learn from those who have helped to make history.

So that after two years of earnest, successful life, the Enterprise makes its appearance upon this its anniversary, pledging to the people of Arlington and near vicinity a continuance of both its time and ability. To our friends who have so invariably given us their en couragement and substantial aid, we cordially extend our grateful acknowledgments.

### ARLINGTON'S POLICE FORCE.

It is generally understood by Boston and her surrounding towns that Arlington has a police force of which it may well be proud. Its chief, A. S. Harriman, displays a peculiar aptitude in tracking out and securing the midnight burglar, and this he does without making any fuss about it. The recent capture of the burglars who have been

### HARMONY PREVAILS.

The Republican caucus held in the Town hall on Tuesday evening of last week shows most conclusively that harmony prevails in the ranks of our town Republicans. Not a disturbing element manifested itself from the beginning to gave Mrs. David Crosby in our last the close of this meeting for the election of delegates to the state, congressional, councillor, county, senatorial and representative convention. The delegates are those of our best representative men. Unity is always a hopeful prophecy of success. A united party is a good deal likely to win at the polls. It is particularly fortunate that the Republican party here in Arlington is to be a unit in the coming November election, and the re-nomination of Senator F- E. Huntress and of Representative J. Howell Crosby emphasizes this unity. Both Senator Huntress and Representative Crosby have proven themselves intelligent and efficient public servants. It is with pleasure that we make public mention of them. The caucus of last week is a good starter.

### THE GROWTH OF THE ENTERPRISE.

The growth of the Enterprise from its first date has been constant and healthful, and this fact has been a decided incentive to us that it shall always prove itself worthy of the public patronage. Hardly a week in our experience dare announce himself either in his rehas passed without bringing us new subscribers, and what is equally encouraging is the fact that we have seldom had disloyalty that may come thereby from a reader discontinue his subscription. a McKinleyite. ### "THE HOPE OF REPUBLICS."

"Stubborn minorities," said DeTocquiville, "are the hope of republics." This philosophical saying comes to us now with peculiar force as the present political campaign approximates to a white heat. Today we have two great the country that if William J. Bryan is elected our flag will at once become government will lose its hold upon the same in complete order. Apply for terms to A. people. On the other hand, Bryan is swearing by all that is good and holy that in case McKinley and Roosevelt are elected then we shall substantially Boys' Short Pant Suits, become an empire In these days of ambitious leve for political preference, the average political campaign is hardly other than a series of misrepresentations of the one party by the other. Starting ut with a truth, each of the contending parties so over-state it that it becomes essentially a lie. For instance, every intelligent man well knows that will not prove a failure whichever party may win at the polls in November.

All this declamatory scare gotten up every four years, that our country is going to the dogs, is a declaration in itself that substantial minorities are the very safeguards of our Republican liberties. We need in a country like ours a William J. Bryan as well as a McKinley. The one is a restraint upon the other, so that each becomes the better and safer man by reason of the other. There are good men in all the political parties, every one of whom would shoulder his musket if need be in defense of his country. Not only do we need these minorities, but we need as well that these minorities should more or less frequently become the majorities. Our Republican government will live just so long as we have two great political parties, each looking with a sharp eye after the other. Roosevelt and B yan compounded make a safe average.

### SHOW YOUR COLORS.

Why not? Is there any law in this ountry whereby a man cannot declare himself upon all questions of public interest? We can but have a supreme contempt for that man who does not ligion or in his politics. If you are Bryan man say so in spite of any cry o perialism. O, to be a man, a courage-

The Baptist Sunday school had a very successful "Rally Day" last Sunday. Their temporary quarters at G. A. R. Hall were overflowing with scholars and friends. Superintendent Richardson gave a very happy greeting, some joyful singing followed by the school. Mrs. Dr. Hooker read an appropriate selection, and Dr. Watson made a congratulatory address. The Pastor's morning congregation was very large.

The old Cotting academy building on Academy street, which has had its day, and a proud one too, has, in its years of disuse and decay, long been an evesore and a menance to all Arlington, and how to get rid of it has long been a question. Now comes the opportunity. By an act of the legislature, when this act shall have been accepted by the town, the selectmen have the power to condemn any old building which endangers the safety of or is a nuisance to surrounding property and order its removal. So at the November election it will be asked that this state act be accepted by the town of Arlington.

INTERESTING LETTER.

1146

[We herewith print by permission of Mrs. G. E. McCallum, Arlington, a letter from her nephew, Trooper W. H. Synder, who was invalided to England from South Africa with enteric fever, and who is convalescing at Arundel castle as the guest of his grace the Duke links, music. of Norfolk.-ED.]

I am going to write you, Aunt Ger trude, at some length about Arundel castle, where I am now a guest, having arrived here last Wednesday. I sent you a book of views of it and marked the room I occupy. Did you get it? It is, indeed, a splendid and palatial residence, and when looked upon must recall the thrilling scenes of bustle and turmoil through which in days of old it passed. Its history extends beyond the reach of every authentic record. was a strong Saxon fort here in 800 A. D. In 1846 Queen Victoria and Albert "the good" stayed here for four days. The Crown Prince Rudolph of Austria visited here in 1879. The Duke of Nor-folk is the premier duke, and, as such, takes precedence immediately after the princes of the blood royal. He is hereditary earl marshal and chief butler of England. He enjoys the earldom of Arundel as a feudal honor by the tenure of the castle itself and not by creation The duke has only returned from the South African war, where he was thrown from his horse.

The approaches to the castle are formed by battlemented walls of pur-beck stone, left in the rough, round and square turrets alternating. The entrance to the precincts of the castle is by a noble gateway of undressed purbeck stone. Over the arch are displayed the amorial bearings of the family. After a short walk through the grounds we pass a second lofty archway. Turning sharply to the left we approach the venerable keep, which, hoary with age and enwrapped with its battled towers of four stories, lit by narrow label-headed windows. In the Broadway is being put in the best possible shape. On both sides of the This is the oldest remaining fragment

> we walk upon the old Norman wall. The passage through which one passes has a room opening from it which is said to be that in which the Empress Mand slept when a guest at the castle in 1134. The bed-posts are here preserved.

> Entering the keep the masonry is most massive. Reared on a mound, ar tificial in part, commanding views of the surrounding district, circular in form, with walls towering 100 above the fosse, and from 10 to 16 feet thick. The opening to the left is the ancient well sidered unsafe it was taken down and the rubbish thrown into the well. The present duke had it recently cleared est were brought to light. Corbels still project from the walls, showing where various chambers once existed, converging to the central subterraneous chamber long and erroneonsly thought to be a passage connecting with the outer world. There were no windows externally; light was obtained from within.

A spiral stair conducts you to the ramparts. If it is a clear day a very extensive panorama can be viewed from the parapet. It was the correct thing for every

castle to have its giant. Arundel had its Sir Brois. This respectable-sized giant was

" stout of heart and limb, And his meekest look was so stern and grim, That even his squire grew deadly pale As he buckled for battle Sir Brois' mail!"

The story runs that his weekly allowance was an ox, 108 gallons of beer, with bread and mustard at discretion. He is also said to have waded across the En lish channel to the Isle of Wight merely for diversion's sake.

Before leaving the interior of the keep the large stuffed owls may claim one's attention. Their country is Nor-way, but when they were originally brought here is unknown. They are the species named "The eagle owl," and are therefore the largest of their

kind. Now for the exterior of the castle. The front is of Portland stone, the styles being a mixture. The grand entrance is by a deep Norman doorway, over which is a triple pointed window, on either side of which are colossal repre-sentations of Hospitality and Liberty, while above it are the Howard arms The oriel window to the left is that of the library, 117 ft. by 35 ft., fitted with richly carved mahogany. On the south side is the Barons' hall, commenced in 1806, and so called to commemorate the signing of Magna Charta, 1215, two of the duke's ancestors having been present. The hall is in the decorated style

sent. The hall is in the decorated style of the fourteenth century, and is lit by some magnificent stained windows. The roof is entirely of oak from the ducal domains, richly wrought.

The apartments in the residential part are named after the kings, heralds and pursuivants of arms.

It is impossible for me to give you an adequate idea of the riches in art contained in the galleries and suites of rooms. Their number is legion. The castle buildings alone enclose a space of castle buildings alone enclose a space of five and a half acres. The ground plan resembles Windsor castle.

The park in connection is one of the crandest for natural scenery in all Great

grandest for natural scenery in all Great Britain. It is about 12 miles around, containing about 11,000 acres.

An interesting feature of the park are the fallow deer, about 1000 in number. Among them many nearly white can be seen. Those are strictly preserved. There is also a herd of Scotch or red deer, also a herd of Indian or Brahmin cattle will be seen, while in the adjoinpaddocks may be seen some fine llamas, also some South American ostriches.

Perhaps a short description of the dairy might interest you. The dairy is an octangular building, surmounted by a cupolal and surrounded by a richly

Messrs. Charles Schwamb & Son are both well known as among Arlington's most reliable business men. The Enterprise extends congratulations on their merited success.

Sunday evening last Rev. A. W. Lorimer gave another of his exceedingly interesting and profitable talks in the Baptist church. On this occasion the subject was "The greatest sin in the world." Quite a delegation of members of the Arlington Heights Baptist church attended the Boston North Baptist association in Tremont temple, Boston, on Wednesday. The church was admitted as a member of the association, and the right hand of fellowship extended to its pastor, Rev. A. W. Lorimer, by Rev. Last Sunday forenoon, in the Baptist church, Rev. A. W. Lorimer preached a sermon especially for the young people, his subject being "The best teacher." Choosing as his text the words "Learn of me," from Matt. ix. 29, Mr. Lorimer showed clearly in a plain and intelligible way that Jesus was the best teacher, and urged his hearers to accept him as such for two reasons; 1st. Because he was the wisest teacher; 2nd, because he was the most winning teacher. In the course of the service three young girls, Marie Schuhmacher (soloist), Helen Davis and Vivian Colprit, sung the hymn, "Our shepherd," as a solo and chorus, very sweetly. Mrs. A. Mr. Franklin T. Anderson of 71 West moreland avenue was indeed a surprised man on last evening, and it was a pleasant surprise too. He returned from his place of business, eat his supper and then lay down on the couch to take a nap and pass a pleasant evening, little knowing this was not to be so. He had fallen in to a quiet sleep when the front door bell was rung by someone who evidently tried to make one loud noise. His sleep was abruptly broken and when he opened the door he was greeted by a score of voices. At first he was somewhat confused but soon regained his composure when he found his friends had planned and were giving him a surprise-he concluded it was a surprise in earnest. He soon had the company seated and commenced to entertain them in his pleasant and agreeable way. Friends came from Boston, Everett and Dorchester, and there was a number present from the heights. Refreshments were served and on leaving the company hoped to again surprise him in the near future. Mr. Anderson was the receiver of many gifts and bou-

"You mustn't be offended because I do not bow to you on the streets" is what a society woman, living not a thousand miles from Arlington, said to au intelligent working woman residing almost within a stone's throw of her. Now we are not a bit surprised at the idiotic saying of the society woman. So called fashionable life is made up for who do not touch the real life at any vital point. When Surgeons Are of No Use. "The driver of the stage, which was rolling down the Rocky mountains as fast as six mules on the gallop could keep ahead of it, may have noticed that I was." said the man who was relating his experience, "a little nervous for after a bit he soothingly said: 'No use to grip that railin so mighty hard. stranger. We shan't come to the danger p'int for balf an hour yit.'

"'Then it's on ahead?' I queried. "'Yes, three miles ahead, and I may say fur your benefit that the hangin on won't do any partickler good.'

"'But I don't want to slide off." "'And you won't. If anything goes, it'll be mewls and coach and the bull caboodle altogether, and as the drop is plump 800 feet you won't hev no use for arnica or stickin plaster arterwards.' "

The Proper Way to Eat.

At a recent meeting of medical men Dr. F. A. Burrall spoke of the amount of mischief done by the very common habit of eating the meals rapidly, according to the farmer's motto of "Quick to eat and quick to work." Thorough mastication was of the utmost importance, and of course this presupposed a proper condition of the teeth. Gastric digestion was often weakened and much distress was caused by the ingestion of too much fluid with the food, particularly at the beginning of a meal. Another factor n causing dyspensia was the habit of eating food in silence or without that mirth and good fellowship so necessary to insure a nervous condition to the normal action of the digestive organs. These little details might seem trite and unimportant, but cian to instruct his patients in regard use of digestive agents served to make the digestive organs lazy and inactive. -Medical Record.

Flies. No wonder we have flies! The common house fly lays 20 eggs every 14 days; there are thus about a dozen bluebottle or blowfly, however, exceeds this and in one season is estimated to have 500,000,000 descendants. Therefore every fly killed early in the season, when they emerge from their winter's hiding place, means a big reduction in the fly crop of the coming summer. We couldn't get on without flies, however, for they do a most important work as scavengers.

### Longavita,

THE TABLET OF LIFE

(Pilula At Longan Vitam.) The Scientific Discovery of the Age!

The Magic Key to the Mystery of Life!

From time immemorial it has been man's predominating ambition to prolong Life. But among the many brilliant minds who have devoted their lives to the fascinating subject in was left to the immortal Darwin to give to the world, in his great theory of Life, the fundamental principle upon which to build all further research in this direction. Following closely in his footsteps came Prof. Dr. Ludwig Buechner, a German scientist of international renown, with his remarkable work entitled "Das Buch des Langen Lebens" (the book on Longvity). But alas, like Darwin, he too died ere he could reap the fruit of his wonderful doctrine. Others, however equally great took up the interrupted thread, with the result that two famous German scientists, after years of experiments and research, have at last discovered the secret of Longevity, in the shape of a remarkable Vegetable Compound, which, if properly used, will positively prolong Life. This new remedy, appropriately named "Longavita" (meaning Long Life) has been subjected to the most rigid tests at all the leading clinics and hospitals throughout Europe with marvelous results. Appreciating the importance of this discovery, we have acquired, at enormous cost, the exclusive proprietary right to this truly wonderful preparation, which has proved a blessing to mankind. "Longavita" is the true Tablet of Life, a rejuvenator par excellence, embodying the veritable secret of Longevity in a practical, feasible form. It is the fountain of perpetual youth, which it prolongs far beyond its present limits, while retaining health in a perfectly normal state. "Longavita" brightens the eye, stimulates mental activity, gives elasticity to the step, makes the face full, absorbs wrinkjes, cleanses the system, purifies the skin, and is the only true Ponce de Leon cremedy for old and young of both sexes. Endorsed by Europe's leading physicians.

WAKING AT NIGHT.

When I wake up alone at night, I feet us if I had no eyes; I stare and stare with all my might,

And, though I strain with either ear, The dark is silent all around; It's just as if I could not hear.

But if I lie with limbs held fast A sort of sound comes like a sigh-Perhaps the darkness rushing past, Perhaps the minutes passing by.

Perhaps the thoughts in people's heads, That keep so quiet all the day, Wait till they're sleeping in their beds, Then rustle out and fly away!

Or else this noise like whirring wings That dies with the first streak of light May be the sound of baby things All growing, growing in the night.

Children and kitty cats and pups, Or even little buds and flowers, Daisies perhaps and buttercups, All growing in the midnight hours

And yet it seems of me a part, And nothing far away of queer \* \* \*
It's just the beating of my heart
That sounds so strange as I lie here!

I do not know why this should be When darkness hides the world from sight, I feel that all is gone but me-

SHE PREFERRED A MAN OF ACTION.

...... 0 ......

Landor was at his desk, which was near the open window. The window looked down on the ponderous, overwhelming traffic of South Water street. The grinding of huge wheels, the crashing of machinery, the clatter of hoof beats, the rattle of harness, the jarring of merchandise, the hoarse voices of porters and drivers, all rose in one mighty, mingled roar, a veritable bellow of commercial prosperity.

Landor did not notice the turmoil. He had become accustomed to it many months ago. He was absorbed, but not in his work. The minute hand had crawled quite around the dial of the big clock in the corner since he had formed a figure on the ledger lying open before him. But he had been writing. His gaze dropped to the page upon his desk. As he scanned the verse he had written his eyes took on the mingled dreaminess and sparkle one sees only in the orbs of a poet.

He drew from his desk a little glove pearl colored and perfumed. There was inspiration in the sight, the scent, the touch, of it. He laid it gently back, seized his pen and began on another stanza.

A brown hand reached over his shoulder. A couple of letters fell on the open ledger. One-the one in the firm, characteristic feminine hand he had come to know-he tore open with fingers that were clumsy through haste. Two, four, closely written pages! Her notes to him heretofore had been of almost telegraphic brevity. He plunged into the first page-had all but read it through, indeed, before he pausedthen jerked back his head as though he had received a shock.

The letter had not been intended for

But it was for him. There was his name-his name in the writing of the woman he loved-to whom he had not dared to speak unless in sweet, wild erses which she never beheld. had read so far unwittingly. He must now read the rest. After what he had ignorantly learned he must now learn more. It meant life and all that life held for him-the words which were traced on the next page-life and love or bitter and enduring disappointment:

My Dear Friend-When you asked me lately if Landor Aldrich should do me the honor to ask me to be his wife-would I marry him-I gave you no reply. I will tel' you now. I fear your opinion should it be lightly formed. I dread lest you think me guilty of a vulgar caprice. I will be quite frank. I think he does care for me, and I—

There the page ended. The dreaminess was gone from his eyes now. There was a red light in them. He'dug his nails into his palms until the fierce pressure pained.

He turned the page. He read on: -well, I've never worn my heart on my sleeve, Eloise. I can't do it now. But you may draw from my silence what inference you will.

"Mr. Aldrich!" He looked up. He was trembling like a leaf. "About that special shipment to the Philippines,

"Yes-no! I don't know. Ask the elevator boy!" he muttered, not comprehending, and again bent over the fateful page. The man shrugged his shoulders and walked away. Landor read on:

You spoke of his charming personality, his rare gifts of mind and spirit. Who should appreciate these more than I, who have known him so well? That one of such social standing, appearance and hereditary wealth should have singled the court from among many cirls who admire him. me out from among many girls who admire him has flattered me indeed; but, should he say the words every woman wants to hear once from man, I must answer, No.

There was a muffled cry. The letter was crumpled in fierce fingers. Then he lifted his bowed head, smoothed

out the page and read on: This, my friend, is why. He is not proving himself. He is an idler, a dreamer. With every avenue of success stretching broad and fair before him he is content to pass hours occupying a pure ly nominal position in his father's office. He leads the cotilion well; none better. In all mat-ters of dilettanteism, his taste is cultured and fine, and he writes the most musical verses one may imagine. One must admire as well as love the man one marries. How can one admire the individual who saunters through life as through a charity fair? His degrees entitle him to a university professorship. His father's various interests in many places call for his averaged extension. versity professorship. His father's various interests in many places call for his personal supervision. There is so much to do before he may confidently ask a woman to give to him herself-fite, body and soul—but I wish; oh, how I wish—

There the letter ended. Aldrich put the letter in his pocket.

He groped for his hat and gloves and coat and went out into the fresh spring afternoon. Then he remembered the unfinished poem. Hel returned, making it, with the glove and other little treasures, into a packet, which he put in his

breast pocket. Half an hour later-he stood in the luxuriously appointed of the directors had just ended. His father was leaving.

"What's up, Landor? You look queer.

"I'm all right, sir. I want a word with you, though. Now will do as well as any time. Whom were you thinking of sending down to establish that branch of our house at Manila?"

"I did think of Peterson, but I'm afraid he has signed with the other péople.

"Will you trust me to go, father?" "You!" The elder man's haggard face lighted up, then fell. "You're not capable of the task, my boy. It's a tremendous one."

Landor smiled with pale lips, but the smile was winning. "You should have more confidence in my father's son,' he protested gently. The words warmed the old man's

heart like wine. His eyes blinked up at his boy. "By George," he cried, "I believe you've got it in you! I've had doubts of you. Let that pass. You shall go with full and absolute author-

And there was a new elasticity in the gait of the commercial magnate as he took his son's arm and went Jown to his carriage.

The following day a note came to Landor-a formal, demure little note:

Dear Mr. Aldrich-I find I failed to send you yesterday my line of thanks for those violets.
Will you take the belated gratitude now? There was a mistake somewhere. Always sincerely yours, KATHERINE CLERMONT.

But the news that he was to assume control of his father's business in the Philippines had been made public in the newspapers before he saw her again. Then it was to say goodby. The hand she gave him was cold as ice, but she looked up at him with steady, unfaltering hazel eyes.

"You are really going, then? It was no newspaper canard? How we shall miss you!"

"I hope you will. May I write to you, Katherine?" He had never called her Katherine till now. "Yes, indeed! But I'm a laggard cor-

respondent. Goodby!" There has not been since the opening up of the islands an affair which so interested the business men of Chicago and other cities as did the success of the great branch house of the Aldriches

in Manila. "A boy of 27 at the head!" the wise ones commented. "It seems impossible that he should have shown such acumen, such ability. By the time he returned for a brief vacation, more than a year later, the business was booming. But the man who came back was not the boy who had gone away. He showed the strain of concentration, deprivation and hard, conscientious work. Katherine Clermont met him for the first time after his return at a great social function. She was in a rippling gown that swirled its black waves about her feet, with poppies garlanding her beautiful shoulders The room went round when she caught

sight of him. How changed, but-"Katherine! Come away! How good you were to write, though so seldom!"

"Do you know you are almost a hero?" she cried quizzically. "All the old men are talking about the way you worked and the results. I am proud I know von!"

He had been ill and lonely and often depressed. Now the gates of heaven stood open.

"You know why I have come back!" he whispered. "To think that if it were not for a letter I chanced to read I might be mooning over verses in an office still-a letter it was not intended

I should read". Her white lids lifted. "How do you know it was not intended for you to read?" Then she laughed softly-softly and long. He wondered why .- Buffalo Enquirer.

### Unused Railroad Tickets.

Some men with unused railroad tickets on their hands sell them to scalpers while others go to the railroad company that issued them and obtain their value in money. Most persons, however, do neither and accept the loss when the ticket is worth less than a dollar, Indeed many persons do not realize that the railroad companies stand ready to redeem unused tickets even of small value, so that the companies must be richer by many thousands of dollars a year through this Ignorance.

Every railroad ticket bears the name of the general passenger agent and of the general manager of the road. It is a simple matter to inclose the ticket with a letter directed to the general passenger agent asking him to refund the money paid and explaining the reason why the ticket is left unused in the hands of the purchaser. It is courteous to inclose a stamped envelope in

which the money may be returned. When all these things have been done, the company generally acknowledges the receipt of the ticket holder's communication and promises to investigate the matter. The investigation consists in the proper identification of the ticket by the agent who sold it and ,a little bookkeeping to set the accounts right. Then the purchaser receives a check for the amount due from the railroad company along with a letter requesting acknowledgment. - New York Sun.

#### Origin of "Soldier." "Soldier," writes Grammaticus in

the Liverpool Daily Post, is a pedigree word. Its connection with the "queen's shilling" may not be obvious, but there it is, all the same. "Shilling" in Low Latin is "solidus," whence comes "soldum," "wages." The man who fights for "soldum" is a "soldier." In Wyclif's New Testament (Luke iii, 14) John the Baptist bids the soldiers to "be apayed with your sowdis" ("be content with your wages"), "sowdis" be ing the north country rendering of "soldis." like "owd" from "old."
